Portfolio

PROFESSIONAL SUMMARY

- 15 years of experience in game development - over 10 years with Unity.
- 2 years of experience leading development teams as a Team Leader.
- Over 2 years of full-stack development experience across multiple programming languages and technologies.
- Experienced in integrating AI-assisted tools into daily development workflows to improve productivity and code quality.

WORK EXPERIENCE

Senior Game Developer at Global Worldwide, Ho Chi Minh

Jun 2025 — Present

- Contributed to the development and optimization of multiplayer game systems, delivering new gameplay features while improving server performance and stability.
- Designed and implemented gameplay features across both client and server systems, supporting live game updates and long-term scalability.
- Maintained and enhanced backend services to ensure reliability, performance, and efficient resource utilization.
- Improved server-side architecture and loading workflows, contributing to better runtime performance and smoother player experience.
- Collaborated with cross-functional teams to deliver feature updates, including gameplay systems and live event content.
- Delivered and supported major features such as **Army Templates**, **Funds Events** in live environments.
- Optimized combat server performance by reducing active combat instance overhead and improving system efficiency.
- Contributed to improvements in game loading performance through backend and service-level optimizations.

Technologies: Unity, C#, C++, TypeScript, MySQL, Redis

Store:

- Google Play: <https://play.google.com/store/apps/details?id=com.gww.km>
- Apple Store: <https://apps.apple.com/us/app/kingdom-maker-build-strategy/id1477420430>

Leader Unity Developer at Bootloader Studio - Pawz

Oct 2023 — Jan 2025

- Contributed to the development of an AI-powered pet companion application for Apple Vision Pro, focusing on architecture, XR integration, and gameplay systems.
- Designed and implemented the Unity-Swift communication layer to enable seamless integration with visionOS and Apple Vision Pro features.
- Developed the **Pet Brain** system, a configurable behavior framework powering AI-driven companion interactions.
- Worked closely with product and design teams to define requirements, evaluate technical feasibility, and deliver features aligned with product goals.
- Contributed to technical decision-making, code quality improvements, and system design reviews to support scalability and maintainability.

- Played a key role in delivering and launching **Pawz** on Apple Vision Pro and the App Store.
- Took ownership of the Pet Brain subsystem and was later promoted internally to lead its development direction and technical execution.

Technologies: C#, Unity (Addressables, PolySpatial, XR/AR/MR systems), Unity Game Services (Analytics, Cloud Code, Economy, Remote Config), Jenkins, visionOS/Swift

Apple Store: <https://apps.apple.com/us/app/pawz-meditate-together/id6593665132>

Senior Game Developer at CAT - FOTA NFT Project, Ho Chi Minh

Feb 2022 — May 2023

- Contributed as a core engineer on an MMO project, focusing on gameplay systems, real-time combat, and backend integration.
- Designed and implemented core gameplay systems, including progression mechanics, character abilities, and multiplayer features.
- Developed real-time PvE and PvP combat systems, enabling scalable and responsive multiplayer gameplay.
- Worked closely with game designers to translate gameplay requirements into functional and maintainable systems.
- Collaborated with blockchain engineers to integrate NFT and wallet functionality, enabling a Game–Marketplace–Game ecosystem.
- Delivered major gameplay milestones, including a complete PvE core loop and a real-time PvP battle system.
- Contributed to system design and architecture improvements that enhanced maintainability and extensibility of the codebase.

Technologies: Unity, C#, Lua, SQL, PostgreSQL, Redis, WalletConnect, MetaMask

Lead Game Developer at VNG Corporation, Ho Chi Minh

Feb 2021 — Feb 2022

- Contributed to the development and maintenance of live-service game systems, focusing on player progression, social features, and gameplay tooling.
- Designed and implemented the **Battle Pass** system, supporting structured player progression, rewards, and engagement mechanics.
- Developed and enhanced **Guild** systems to support player social interaction and community features.
- Built and improved Unity editor tools to streamline content integration, reduce manual workflows, and improve development efficiency.
- Collaborated with backend engineers to integrate client-side gameplay features with server systems and databases.
- Supported ongoing maintenance and optimization of live systems to ensure stability and scalability.
- Delivered and maintained key live-service features, including Battle Pass and Guild systems in production environments.

Technologies: Unity, C#, Java, SQL, Redis, PostgreSQL

Senior Game Developer at KIXEYE, Ho Chi Minh

Nov 2018 — Feb 2021

- Contributed to the development and maintenance of cross-platform game products, supporting client, backend, and live operations systems.
- Managed build, release, and deployment pipelines across multiple platforms, including iOS, Android, Steam, and WebGL.
- Developed and maintained gameplay features across both client (Unity) and server-side systems.
- Led WebGL porting and optimization efforts to ensure stable browser-based gameplay performance and compatibility.
- Integrated third-party SDKs for analytics, monetization, authentication, and platform services.

- Developed and maintained internal admin tools and web-based dashboards to support live operations and content management.
- Supported release cycles and platform compliance processes to ensure smooth multi-platform deployments.
- Delivered successful multi-platform releases and contributed to improving system stability and operational reliability.

Technologies: Unity, C#, C++, Scala, PHP, JavaScript, iOS, Android, Steam, WebGL

Senior Game Developer at GNT (Gianty), Ho Chi Minh

Jan 2017 — Jun 2018

- Developed core combat, character controller, and AI behavior systems for an action JRPG.
- Created internal Unity tools that accelerated level design and gameplay iteration workflows.
- Implemented VFX, camera effects, and cinematic systems to support storytelling and player engagement.
- Optimized gameplay performance and memory usage across client systems.
- Developed Lua-based scripting solutions for quests, story events, and cinematic sequences.

Technologies: Unity, C#, Lua, SQLite

Senior Game Developer at Faceroll Games, Ho Chi Minh

Sept 2014 — Apr 2015

- Developed a multiplayer MOBA/FPS game featuring transformable vehicles and robots using Unity and Photon.
- Implemented character systems, including abilities, controllers, animations, shooting mechanics, and combat behaviors.
- Developed VR gameplay support for HTC Vive and Oculus Rift, including VR controller interactions.
- Enhanced visual quality through post-processing effects and gameplay polish.

Technologies: Unity, C#, Photon, HTC Vive, Oculus Rift

GAME DEVELOPER at Gameloft

Jul 2009 — Jun 2014
